Professional Summary

Full Stack Developer with end-to-end experience across React, Next.js, React Native, Node.js, and Firebase, and a strong track record in the health and wellness sector. Delivered systems used by tens of thousands of users and hundreds of employees in mission-critical environments (clinical laboratories, health platforms), with architecture decisions guided by SOLID and Clean Architecture principles. Led a development team technically and also design and build my own products, such as Lumen, a multilingual microlearning app.

Skills

Languages: JavaScript, TypeScript, Kotlin, Swift, SQL

Frontend: React, Next.js, React Native, NativeBase (now gluestack), Expo, MaterialUI, TailwindCSS, HTML, CSS

Backend: Node.js, NestJS, Express

Databases: PostgreSQL, MongoDB, NoSQL, SQL Server, Firebase, Supabase

Tools & Testing: Git, GitHub Actions, Jira/Atlassian, Jest, Sequelize, Prisma, Tauri, Electron, Vercel, Selenium, Puppeteer, Storybook, Figma

Methodologies: Scrum

Languages

- **Portuguese:** Native
- **English:** Upper-Intermediate – working proficiency, used regularly in technical meetings and written documentation
- **Spanish:** Working proficiency (applied in a multilingual product)

Professional Experience

Full Stack Developer – Fully Ecosystem

June 2025 – July 2026

Built the Fully app — a startup under the Prudential group — a health and wellness platform used by **tens of thousands of users**, using React Native for the main app, native modules in Kotlin/Swift, and a NestJS back-end with PostgreSQL and MongoDB.

- **Weekly goals system** personalized per user, covering physical activity, nutrition, and mental health.
- **Integration with Samsung Health, Apple Health, and Health Connect**, with automatic data sync across platforms.
- **Redesigned authentication system with ForgeRock**, resulting in a **40% improvement in authentication speed**.
- **Admin modules built with Next.js** for user management, focused on scalability.
- **Cross-functional collaboration** directly with design and product teams to align technical priorities with business goals.
- **Technical communication in English** in recurring meetings with different Prudential teams, aligning product priorities, architecture, and bug fixes.

Full Stack Developer – DNA Center

April 2022 – June 2025

Led the development team technically – architecture, coding standards, code reviews, and ongoing technical support – applying SOLID and Clean Architecture principles to systems used daily by **300+ employees across 40 laboratory units**.

- **Created and led the Design System** from the ground up, with formal documentation in Storybook and Figma, standardizing reusable components (React/React Native, TailwindCSS, MaterialUI) across all internal systems.
- **Real-time queue/ticket calling system for lab exams**, resulting in a **50% reduction in patient wait times**.
- **Cloud-based medical document digitization and storage platform** handling millions of records (Firebase Storage/Firestore).
- **Microbiological blood sample tracking system**, focused on traceability and quality control.
- **Automations with Puppeteer and Selenium**, eliminating repetitive manual tasks for hundreds of employees.
- **Automated testing and CI/CD** with Jest and GitHub Actions pipelines, reducing regressions in deployments.
- **Built an internal task management tool** (Scrum/Kanban), inspired by Jira/Trello, developed from scratch to streamline team workflows.
- **Productivity dashboard** for employees, with automated calculations and dynamic visualizations integrated with operational data.
- **Insurance billing reconciliation platform**, centralizing data and automating previously manual processes.

Full Stack Developer (Freelance) - AvaliarMe

February 2023 - June 2025

Built and maintained web applications for **50+ establishments**, directly and indirectly impacting **1,000+ people**, using Next.js, TailwindCSS, and Firebase.

- **Interactive clinical dashboards** with automatic report generation and custom PDFs per user profile.
- **Integration with the official WhatsApp API (Meta)** for automated messaging and notifications.
- **Continuous deployment and automation** via Vercel, with cron jobs for recurring tasks such as scheduled emails and messages.

Personal Projects

Lumen - Microlearning App

Designed and developed a mobile microlearning app, positioned as a value-driven alternative to endless social media scrolling. Available in Portuguese, English, and Spanish, targeting curious professionals aged 25-45. Responsible for marketing (Google Ads campaigns), interface design, and product development.

Other projects: several experimental and learning projects available at github.com/valentimcanejo

Education

Bachelor's Degree in Systems Analysis and Development

Federal Institute of Education, Science and Technology of Rio Grande do Norte (IFRN)

2017 - 2023
